-Diplomate of the American **B**oard of **O**rthodontic (ABO)

-Fellow of The American College of Dentists (FACD)

-Private Practice of Orthodontics and Dentofacial Orthopedics in Marietta, Georgia

Objectives

In order to be effective in achieving ideal results for the growing patient, the modern practitioner must be knowledgeable and experienced in the details of differential diagnosis, prognosis, treatment planning, treatment options, and biomechanics. In setting treatment goals and biomechanics design, it is essential for the dental specialist to ascertain that which is both possible and practical. Attainment of the ideal is not easy, nor is it simple. Merely aligning teeth is far from a detailed and finished occlusion that is in harmony with the dentofacial form. Of critical importance to the patient is the dental specialist's ability to recognize his or her strengths, and limitations. Functioning together for the good of the patient, we can look forward to the achievement of fine results for our patient families. (g)nathos courses are open to all dentists regardless of specialty.

Learning Objectives and Description of *The CMDD, 2022*

The Clinical Modification of Dentofacial Development (CMDD) is an intermediate & advanced clinical course involving the intensive study of the technical modification of dental and facial development for the growing patient. The course has been specifically designed for the practitioner who seeks a more sophisticated; evidence based and advanced approach to all phases of age appropriate orthodontic and dentofacial orthopedic treatment. Emphasis is placed on detailed diagnosis, prognosis, treatment options, bracket positioning, arch-wire sequencing, treatment mechanics, retention design, trouble-shooting and evaluation of chief complaints. These apply to mixed dentition treatment as well as orthodontic treatment for teenaged patients. Adult interdisciplinary dental rehabilitative treatment is not part of this course.

Participants are exposed to an intensive study of Class I, II, and III discrepancies. This is accomplished through representative surveys of clinically detailed diagnosis, prognosis, treatment planning, treatment options, biomechanics design, problem solving and retention rationale. These are accomplished utilizing a **"hands-on" team format with substantial class participation**. An essential part of the course incorporates the concept of planning "treatment options". Clinicians who have been treating orthodontic and dentofacial orthopedic patients for more than 12 months have encountered the variability of treatment responses displayed by various patients. It is discovered very quickly that just because one *wants* the treatment to be successful does not mean that treatment *will* be successful, nor that the patient's progress will be satisfactory.

Therefore, problem-solving is essential to the treatment planning process. The clinician must pose questions such as; "What if this treatment plan isn't working? How and when will I know that the treatment method needs to be altered? If I am not achieving an adequate treatment response, what should be my first treatment option for this individual? What are the factors that are responsible for a lack of treatment response? Is a lack of treatment response, or an adverse treatment response predictable during the pre-treatment, diagnostic stages? What are the areas of guarded prognosis for the case? How shall I inform the parent of the areas of guarded prognosis? Is this a borderline extraction situation? How and when will I know if non-extraction will be successful? What could go wrong during treatment if I'm not careful? What will be the appropriate retention design for this patient? How do I characterize TMJ and facial pain risk factors prior to the initiation of treatment? What if a TMJ and/or facial pain problem arises during treatment? When and why is it better to refer to an orthodontic specialist?

Generally, the *CMDD* can be described as a *concentrated, intense, festive and engaging experience*. Evening sessions are common. If you have not already done so, discussing the *CMDD* with someone who has completed the course is an excellent idea. If you'd like, we'll be happy to supply you with list of clinicians in your area who have experienced *The CMDD*. Included in your tuition is 1 year unlimited access to **The Learning Center** <http://gnathosce.com/> This is a \$1500.00 added value. The information on this site is exceptionally useful.

After completion of the CMDD, participants are eligible to be invited to the next level of Advanced (g)nathos Orthodontic Seminars. These are held once per year for 2 days per session.

During 2022 the only complete *CMDD* course will be offered at The *(g)nathos home room* just 20 minutes north of Atlanta in Marietta, Georgia. (Note: the meeting is held at the gnathos classroom - NOT held at a hotel). ***COVID Vaccination Recommended.*** After your confirmed registration is received, complete location and lodging and needed instrument details will be sent to you. The CMDD is limited to 20 participants. Only complete registrations are available, and registration is on an ordered basis. *Please note that courses are typically fully subscribed 4 - 6 months prior to the starting date.*

Lodging and Ground Transportation

Confirmed registrants will receive all lodging, ground transportation and course location details by mail. Currently, we are in the process of negotiating room rates. **Registrants will receive all lodging and transportation details well in advance of the course.** You will need to provide your own transportation to and from the airport, hotel, and course site. During September, 2022 for the purpose and options of room and car rental sharing the "2022 CMDD, Atlanta" participants list will be available.

2022 Tuition, Attendance, and Course Location

The complete tuition for the 2022 CMDD is US\$6800.00 and includes attending **Sessions 1 & 2**, all course manuals, notebooks, reprints, wires, orthodontic auxiliary supplies, and refreshments. . Included in your tuition is 1 year unlimited access to **The Learning Center** <http://gnathosce.com/> This is a \$1500.00 value – an exceptional “value added” feature. Upon confirmed registration access codes will be emailed. Participants will need to supply their own orthodontic pliers and after registration a list of required instruments will be sent to you. In order to register, complete the enclosed *CMDD* registration form. To confirm your registration for the *CMDD* a deposit of **US\$1200.00 is required**. Sorry, credit card payments are not available. After your registration is received, you’ll be sent directions to the course site, various reading lists, reprints, instrument lists, and hotel recommendations. **In order to allow ample time to read and prepare for the course, early registration confirmation is encouraged.**

Location: The *2022 CMDD* will be held at *The (g)anthos home room* about 25 minutes north of Atlanta in Marietta, Georgia. Confirmed participants will receive all transportation details and hotel accommodation details by email.

Covid vaccination recommended.

Payment, Refund Policy and The Learning Center

<http://gnathosce.com/> *

The complete tuition for the 2022 CMDD is US\$6800.00 and includes attendance at **both Sessions 1 and 2**. To reserve a place in the class **US\$1200.00 deposit is required**

(see page 6) Sorry, credit card payments are not available. Included in your tuition is 1 year unlimited access to The Learning Center <http://gnathosce.com/> This is a \$1500.00 added value. You will find the information on this site of exceptional value. Upon confirmed registration access codes will be emailed. In addition to the US\$1200.00 tuition deposit, I ask that you pay the \$5600.00 balance on or before September 5, 2022. Sorry credit card payments are not available.

The US Postal Service has become increasing unreliable. **Payment using ZELLE is encouraged. Contact me for details.**

Tuition deposits are 100% refundable until the site access code is emailed.

After the access code is emailed money paid is 100% transferable (but not refundable) for 12 months or until October 20, 2023 to any meeting held at the (g)nathos class room in Marietta, GA.

(g)nathos Orthodontics 2022

2022 (2) Month, 8 Day Format in Atlanta, Georgia

Gerry Samson, DDS, ABO, FACD, TE

Diplomat of The American Board of Orthodontics (*ABO*)

Fellow of The American College of Dentists (*FACD*)

Gerry Samson is a 1975 graduate of Marquette University Dental School. He completed pediatric dental residency in 1979 at Emory University under the direction of Dr. Ed. Hibbard. He went on to complete orthodontic residency in 1981 under the direction of Dr. Harold T. Perry at Northwestern University in Chicago, Illinois.

From 1981 until 1987, Dr. Samson was an Assistant Professor at Emory University in Atlanta. His teaching responsibilities in the Division of Craniofacial Development - Department of Orthodontics included post-doctoral seminars in craniofacial osteology and physiology; craniofacial growth and development; historical and contemporary literature review; and the clinical application of Ricketts Analysis, diagnosis, prognosis, treatment planning and clinical biomechanics design. In 1987, Dr. Samson was named Director of the *Institute for Bioprogressive Education, The Ricketts School of the Southeastern United States* by Dr. Robert M. Ricketts. Dr. Samson has lectured extensively and is a *Diplomat of The American Board of Orthodontics and a Fellow of The American College of Dentists*. He has been a featured speaker for numerous regional, national and international meetings including the annual sessions of The American Association of Orthodontists (AAO); The American Academy of Pediatric Dentistry; The Northeastern Society of Orthodontists; The Pacific Coast Society of Orthodontists, The University of California at San Francisco Orthodontic Alumni; The Southeastern Society of Pediatric Dentistry; The Australian Orthodontic Society Annual Sessions; The New Zealand Association of Orthodontists, The South African Society of Orthodontists, The Mexican Association of Orthodontists, The Thai Association of Orthodontists, The Indonesian Society of Orthodontists, The Parana Orthodontic Society of Brazil, The Orthodontic Education and Research Foundation (OERF); The Graduate Orthodontic Residency Program (GORP), The Asian Pacific Orthodontic Congress, The Salvadorian Orthodontic Society and The Israel Society of Orthodontists.

Currently, Dr. Samson is Adjunct Professor at The University of Texas at San Antonio; Associate Professor at Case Western Reserve University Department of Orthodontics, Saint Louis University Department of Orthodontics, University of Tennessee Memphis, Virginia Commonwealth University, and at University of Alabama at Birmingham. He was co-principal investigator studying the *Psychological Aspects of Orthodontic Patient Compliance*, funded by The National Institute of Health- Division of Behavioral Medicine, co-guest editor for Seminars in Orthodontics Journal, "Age Appropriate Orthodontic Treatment, 2014" and author of the 2016 orthodontics mechanics chapter reference text book by Wiley Publications, "Recognizing and Correcting Developing Malocclusions: A Problem-Oriented Approach to Orthodontics". Starting in 1981 and for 40 years Dr. Samson was in the full-time private practice of orthodontics and dentofacial orthopedics in Marietta, Georgia. Because of his special interest in the clinical modification of dentofacial development, Dr. Samson's private practice is essentially limited to "growing" patients.
